

## **Webinar on Computer Tomography (CT) Technology and its role in managing Covid 19 scheduled on April 14, 2020 at 3PM IST**

We are quite overwhelmed by the count of registrations for the webinar planned by APJ Abdul Kalam Technological University in association with Siemens Healthineers.

We have received **1,100** registrations in total from students, faculty members and industry representatives as on April 14<sup>th</sup> at 7.15 AM. The registrations have hence been closed for the webinar.

It is our intent to help ensure that all students and faculty members are benefited from the session. However, deeply regret to inform that we would not be able to accommodate everyone for the webinar due to constraints in the video conference software and bandwidth availability. The participation in the webinar will be based on first come first served basis.

The university will try level best to explore alternate arrangements (like making available the recording of the webinar or requesting for one more session) for those participants who are unable to attend the webinar. However, it is subject to approval of representatives of Siemens Healthineers.

Requesting your support and cooperation. Please refer below for details of joining the webinar.
